

ATTACHMENT MANAGER

Increase firm compliance, and manage attachments from within your email.

Attaching documents to an email sounds simple, however it is often a drawn out process involving manual scanning, saving and renaming. And that's before the document is attached to the email!

By implementing inMailX Attachment Manager, your staff will be able to efficiently convert, combine, reorder, clean and secure email attachments from within an Outlook email.

With inMailX Attachment Manager you can:

- ✓ Remove metadata in Word, Excel and PDF attachments
- ✓ Order, combine, rename, clean and bookmark multiple attachments into a single PDF
- ✓ Secure PDF and ZIP content with a password
- ✓ Protect PDF content by disabling content copying, modifying and/or printing
- ✓ Combine, compress and secure attachments into ZIP
- ✓ Rename and reorder attachments when composing emails
- ✓ Undo or Redo to quickly revert actions performed on attachments
- ✓ Include firm attachment policies in emails
- ✓ Prompt users to convert attachments to PDF when sending

inMailX Attachment Manager will help improve your risk management policies by maintaining corporate ownership of PDF content through centrally managed passwords. Metadata cleaning and the inclusion of firm attachment policies will afford your business greater control over email content and security.

Solve inefficiencies in the management of email attachments by using inMailX Attachment Manager to streamline your attachment conversion process.
