

inMailX® for iManage Work

Enterprise Email Management for iManage Work

Enhance Email Management and Compliance

As organisations are required to capture and manage emails and documents to meet their corporate, legislative and regulatory requirements, an effective solution is crucial to ensure emails and attachments are filed and managed in accordance with such requirements.

inMailX for iManage Work is an enterprise email management solution for Microsoft Outlook and iManage Work/Worksite, designed to improve information governance and compliance. inMailX for iManage Work solution consists of inMailX Email Manager Module and inMailX iManage Work/Worksite Connector.

With inMailX for iManage Work, users can file incoming and outgoing emails into iManage Work in an intuitive and simple process, reducing the complexity of managing and sharing email correspondence.

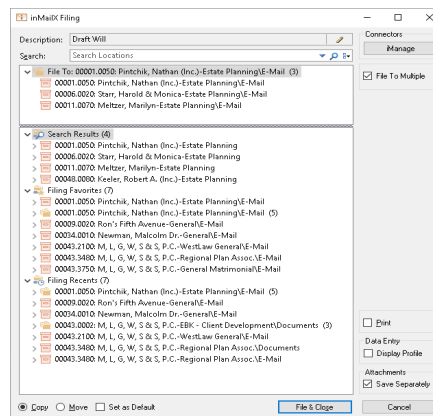

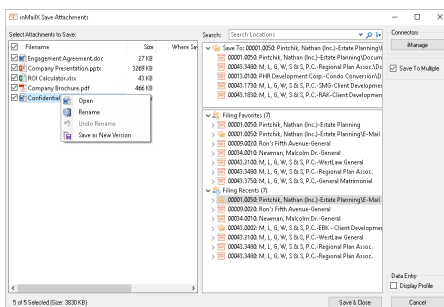

inMailX can be configured to force users to file their emails into iManage Work, mitigating risk and ensuring compliance with corporate policies.

inMailX for iManage Work improves email filing compliance, enhances work practices, and increases user adoption.

Empower Users and Improve Productivity

inMailX for iManage Work provides a simple and intuitive email management solution for iManage Work, enabling users to quickly file emails and save attachments into their filing favorites or recently used workspaces.

With inMailX users can easily file emails and save attachments into single or multiple workspaces. Also, email attachments can be saved separately and automatically related to the filed email, helping users to easily identify and locate related emails and attachments.

When filing emails, users can easily select to save attachments separately from one window.

When using "Quick File," users can file emails into their filing favorites or recent workspaces without any additional prompts.

inMailX supports emails and attachments duplicate detection, and description masks can be used to standardize the emails and attachments description across all users.
