

inMailX® Attachment Manager

Attachments Compliance and Productivity Tools

Prevent Data Breaches and Increase Compliance

Reducing the risk of sharing confidential information when sending documents via email is essential to protect sensitive information and prevent data breaches. inMailX Attachment Manager has been designed to assist companies enhance their regulatory compliance and mitigate risk through greater control over email delivery and attachments confidentiality.

Confidential emails and attachments can be accidentally sent to the wrong person or to the wrong company. inMailX 'Send Guard' has been designed to prevent such data breaches by prompting users to check and confirm that confidential emails and attachments are sent to the correct recipients.

With inMailX Attachment Manager, users can also be prompted to Clean metadata from attachments or convert attachments to PDF when sending external emails.

For an added level of security, users have the ability to quickly password protect Word, Excel, PowerPoint and PDF attachments, and also Rename, Reorder and Compress attachments 'on the fly'.

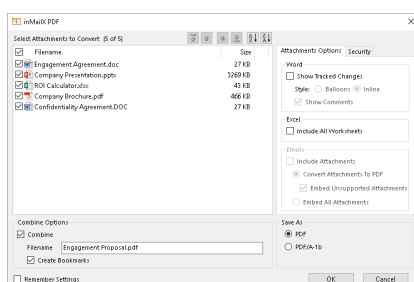

Attachment management tools are easily accessible from the Outlook ribbon.

Empower Users and Improve Productivity

inMailX Attachment Manager enables users to selectively convert attachments into PDF, while composing emails. Email attachments can also be easily renamed, reordered, cleaned of metadata, password protected or compressed to ZIP at the push of a button.

Attachments may be renamed, reordered, bookmarked and combined into a single PDF in one easy step. As part of the PDF conversion process, users can simply choose to show tracked changes and comments for Word attachments, or include all worksheets for Excel attachments. In addition, they can apply password protection for extra security.

Rename, Reorder, Combine and PDF multiple attachments in one easy step.

The Rename function enables users to rename attachments within an email, without affecting the filename of the original document.

Changing the order of email attachments is easy with drag and drop reordering. Users may also reorder attachments alphabetically, at the click of a button.

Simple and efficient Undo and Redo functions allow users to step backward or forward through actions taken, so they can easily rectify errors or omissions.
